Experience

Freelance Web Engineer   Jan 2024 — Present

- Built content-driven websites using **WordPress**, implemented customized features, and designed custom post types and taxonomies for content organization.
- Led frontend team members in building a news content media website from scratch using **Nuxt** and **Docker** for the development environment.
- Developed a real-time interactive chat room for simultaneous communication during video broadcasts and a live data visualization platform for election results, both using **WebSocket**.
- Delivered projects using modern frontend frameworks focusing on performance and user experience, improving the **Core Web Vitals** score from **50** to over **90**.

Technologies: Vue.js, React, Nuxt, Next.js, PHP, WordPress, Docker, WebSocket

Senior Web Engineer · Monoame Design   Jul 2022 — Dec 2023

- Maintained and refactored outdated projects by following software design principles.
- Designed **CI/CD** pipelines via **GitHub Actions** for a more efficient code delivery process, which reduced development time by **30%**.
- Developed content-driven websites with **i18n** support using **Next.js** and **Strapi**, designed customized Strapi features for client needs including content field components and APIs.
- Specialized in building interactive and creative web applications, one of which won the Red Dot Design Award in 2022.

Technologies: React, Next.js, Vue.js, Strapi, i18n, Node.js, Docker, GitHub Actions

Frontend Developer · 104 Corp   Sep 2019 — Jul 2022

- Collaborated with the design team to deliver projects in an agile environment.
- Built a starter template CLI tool that accelerates the frontend development process and enhanced the code delivery workflow with a **Docker**-based environment.
- Led the integration of emerging technologies to embrace new trends in frontend development, especially the migration from **Vue 2.x to Vue 3**.
- Initiated the project of a low-code platform and content conversion tool, significantly reducing development time and streamlining data transformation processes by nearly half.
- Honored as Employee of the Year in 2021 for exceptional contributions to project success and innovation.

Technologies: Vue.js, Sass, Vite, webpack, Node.js, Docker

Career Transition   May 2019 — Sep 2019

Self-taught programming journey, learning basic frontend skills and tools from Youtube and online courses. I use **jQuery** and **Sass** to build my first personal website from scratch, which is hosted on **Github Pages** and help me to get my first job as a frontend developer.

Technologies: HTML, CSS & Sass, JavaScript, jQuery, Bootstrap, Webpack, Gulp

Skills

Programming Languages

JavaScript(ES6+), TypeScript, HTML, CSS/Sass, PHP, GraphQL

Frameworks & Libraries

React, Next.js, Vue.js, Nuxt, Node.js, TailwindCSS, styled-components, Framer Motion

Platforms & Tools

Git, Vite, Docker, AWS, Vercel, WordPress, Strapi, Figma, Cypress, Jest

Development Concepts

RWD, A11y, Core Web Vitals, Cross-Platform Compatibility, RESTful API, CI/CD, SEO, Security, Testing

Selected Projects

ccleo.dev

A newly developed personal website to showcase my professional skills and portfolio.

Matsu Biennial 2023

Migrated from WordPress to Strapi as the headless CMS, with deployment handled through Elastic Beanstalk.

Smart Capital Official Website

Built with WordPress as the headless CMS and Nuxt as frontend framework.

Open Source Contribution

varletjs/varlet

- fix/snackbar animation (#611)

Education

National Central University

Taiwan

Bachelor of French Language and Literature
